

Nick Evans

Senior Quality Engineer

Ann Arbor, Michigan | evansnicholasa@gmail.com | [linkedin.com/in/evansnicholasa](https://www.linkedin.com/in/evansnicholasa)

Senior Quality Engineer with nearly 8 years of experience designing automation frameworks and test coverage across UI, API, mobile, database, and integration layers using Java, TypeScript, C#, and Swift. Led 4 quality engineers supporting a cross-platform customer application used by 5M+ customers.

TECHNICAL SKILLS

Languages: Java, C#, TypeScript/JavaScript, Swift, SQL

Automation: Playwright, Selenium WebDriver, REST Assured, RestSharp, Cucumber, Reqnroll, Citrus, TestNG

Testing: UI, REST/SOAP API, mobile/iOS, integration, end-to-end, regression, functional, exploratory, database, cross-browser, unit testing, asynchronous messaging

Platforms, CI/CD and Tools: Spring Boot, .NET, Azure DevOps, Jenkins, OpenShift, Google Cloud Platform, Maven, Git, GitHub, Jira, Postman, Claude Code (personal project)

PROFESSIONAL EXPERIENCE

NTT DATA — Senior Quality Engineer / Quality Engineering Consultant Oct 2018 – Present

Senior Quality Engineer | HCA – Outpatient Express Registration Apr 2025 – Jul 2026

- Wrote reusable interaction and assertion methods in Swift and automated iPad tests.
- Designed a .NET API automation framework in C# using Reqnroll and RestSharp, providing shared setup, request, response, assertion utilities, and a Docker file for pipeline integration
- Designed and automated UI and REST API test cases in C# for critical outpatient registration workflows

Senior Quality Engineer | Campbell's – Azure Migration Jan 2025 – Apr 2025

- Refactored and stabilized TypeScript Playwright tests while expanding automated coverage
- Ported C#-embedded database queries to MySQL to validate data returned by APIs
- Identified environment, configuration, and integration defects during an Azure migration and partnered with DevOps to resolve migration blockers

Lead Quality Engineer | SoCalGas – My Account Oct 2023 – Dec 2024

- Led 4 quality engineers in an Agile/Scrum environment, delivering manual and automated testing for a cross-platform application serving 5M+ users
- Created and executed end-to-end test plans and test cases covering UI, REST/SOAP APIs, databases, browsers, platforms, and device types
- Mentored 4 quality engineers on test design, automation development, execution, and defect triage
- Supported production releases through risk-based regression testing and rapid defect triage

Developer and Lead Quality Engineer | UPS – FTC System Integration Apr 2022 – Oct 2023

- Led manual and automation testing of integration between UPS systems and a vendor application
- Developed Spring Boot microservices exposing REST APIs, along with data-access components, Oracle stored procedures, and unit tests
- Diagnosed defects through root-cause analysis and implemented fixes across API and database layers
- Automated REST API and asynchronous messaging integration tests for JMS queues and publish/subscribe topics using Java, Cucumber, and Citrus

Test Automation Engineer | UPS – Jumpseat and Crew Systems Nov 2018 – Apr 2022

- Automated UI, REST API, and AMQ/WMQ messaging workflows for jumpseat scheduling, crew messaging, and parameter-management services using Java, Selenium WebDriver, REST Assured, and Cucumber
- Designed and maintained end-to-end test coverage across distributed aviation systems, validating message ordering, service integrations, and application workflows

EDUCATION

Bachelor of Science in Computer Science | Eastern Michigan University, Ypsilanti, MI
