# Nick Evans

**Senior Quality Engineer** | Ann Arbor, Michigan

evansnicholasa@gmail.com | 734-904-7415 | linkedin.com/in/evansnicholasa | evansnicholasa.github.io

## PROFESSIONAL SUMMARY

ISTQB-certified Senior Quality Engineer with nearly 8 years in quality engineering. Automated UI, API, mobile, and integration testing of enterprise applications in object-oriented Java, TypeScript, C#, and Swift, and designed a .NET API framework at HCA. Led 4 quality engineers on a cross-platform application used by 5M+ customers.

## TECHNICAL SKILLS

**Languages:** Java, C#, TypeScript/JavaScript, Swift, SQL (MySQL, Oracle PL/SQL, SQL Server)

**Automation:** Playwright, Selenium WebDriver, REST Assured, RestSharp, Cucumber, Reqnroll, Gherkin, TestNG

**Testing:** UI, REST/SOAP API, mobile/iOS, integration, end-to-end, regression, functional, exploratory, cross-browser, unit testing, asynchronous messaging

**Platforms, CI/CD and Tools:** Spring Boot, .NET, Azure DevOps, Jenkins, OpenShift, Google Cloud Platform, Maven, Git, GitHub, Jira, Postman, Claude Code

## PROFESSIONAL EXPERIENCE

**NTT DATA — Senior Quality Engineer / Quality Engineering Consultant** Oct 2018 – Sep 2026

**Senior Quality Engineer** | HCA – Outpatient Express Registration Apr 2025 – Jul 2026

- Wrote reusable interaction and assertion methods in Swift and automated iPad tests.
- Designed a .NET API automation framework in C# using Reqnroll BDD and RestSharp, with shared API libraries and assertion utilities, and a Dockerfile, and ran its tests in GitHub Actions pipelines
- Designed and automated UI and REST API test cases in C# for critical outpatient registration workflows

**Senior Quality Engineer** | Campbell's – Azure Private Network Migration Jan 2025 – Apr 2025

- Refactored and stabilized TypeScript Playwright tests while expanding automated coverage to over 90%
- Ported C#-embedded database queries to MySQL, a relational database, to validate data returned by APIs
- Identified environment, configuration, and integration defects as microservices moved to private Azure networking

**Lead Quality Engineer** | SoCalGas – My Account Oct 2023 – Dec 2024

- Led and mentored 4 quality engineers in an Agile/Scrum environment, delivering manual testing and Java test automation for a cross-platform application serving 5M+ users
- Replaced Excel test data in the Java framework with JSON, so data changes showed up in pull requests
- Created and executed end-to-end test plans and test cases covering UI, REST/SOAP APIs, databases, browsers, platforms, and device types
- Release quality gate for my team on production releases, with risk-based regression and defect triage

**Developer and Lead Quality Engineer** | UPS – FTC System Integration Apr 2022 – Oct 2023

- Led manual and automation testing of integration between UPS systems and a vendor application
- Developed Spring Boot microservices exposing REST APIs, along with data-access components, Oracle PL/SQL stored procedures, and unit tests
- Diagnosed defects through root-cause analysis and implemented fixes across API and database layers
- Automated REST API and asynchronous messaging integration tests for JMS queues and publish/subscribe topics using Java and Cucumber

**Test Automation Engineer** | UPS – Jumpseat and Crew Systems Nov 2018 – Apr 2022

- Automated UI, REST API, and AMQ/WMQ messaging workflows for jumpseat scheduling, crew messaging, and parameter-management services using Java, Selenium WebDriver, REST Assured, and Cucumber
- Designed and maintained end-to-end test coverage across distributed aviation systems, validating message ordering, service integrations, and application workflows

## EDUCATION & CERTIFICATIONS

Bachelor of Science in Computer Science | Eastern Michigan University, Ypsilanti, MI
ISTQB Certified Tester Foundation Level (CTFL) | ASTQB, September 2026
